PROFESSIONAL SUMMARY

- Front-End Developer with hands-on experience building responsive web applications and structured, system-based projects.
- Strong background in HTML, CSS, JavaScript, React, PHP, and MySQL, with a focus on clean architecture, organized code structure, and user-centered design.
- Completed a Front-End Development internship at Webura Company, gaining practical, team-based experience delivering production interfaces.
- Experienced in building complete projects — authentication systems, inventory management, and academic applications — using Git, GitHub, and Docker; committed to continuous learning.

WORK EXPERIENCE

IEEE Computer Engineering Chapter | *Gaza, Palestine* — Jul 2026 – Present
Member (Part-time)

- Active member contributing to technical workshops, engineering events, and professional development initiatives.
- Strengthened collaboration, problem-solving, and communication skills through ongoing technical activities and community engagement.

Webura Company | *Gaza, Palestine* — Apr 2026 – Jun 2026
Front-End Developer Intern

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Collaborated with the development team to build and improve web applications.
- Converted UI designs into responsive, maintainable websites.
- Followed clean coding practices and modern front-end development standards.

EDUCATION

The Islamic University of Gaza | *Gaza, Palestine* — Aug 2022 – Jun 2026
B.Sc. in Computer Science — Grade: 86.85% (Very Good)

- Graduation Project: PharmaAid Gaza — an application for medicine search, drug availability tracking, pharmacy location services, and generic alternatives within Gaza.

PROJECT EXPERIENCE

Personal Project | *Gaza, Palestine* — Sep 2026 – Oct 2026
AURUM — Heritage 42: Scroll-Driven Luxury Watch Experience
Live Demo | GitHub Repository

- Designed and developed a bilingual (English/Arabic) cinematic website in React and TypeScript, where a luxury timepiece is disassembled and rebuilt as the visitor scrolls.
- Built the scroll choreography with GSAP ScrollTrigger and Lenis, responsive layouts, nine product pages, and a validated contact form; added SEO prerendering, structured data, and a hardened CSP and security-header setup.

Personal Project | *Gaza, Palestine* — Aug 2026 – Sep 2026
Personal Portfolio Website — Bilingual Interactive Site
Live Demo | GitHub Repository

- Designed and built a bilingual (Arabic/English) React portfolio with full RTL/LTR switching, dark/light themes, and a glassmorphism visual identity.
- Implemented an interactive Canvas particle background, typewriter animation, scroll-reveal effects, modal-based showcases, and a working contact form.

Graduation Project | *Gaza, Palestine*
PharmaAid Gaza — Digital Solution for Medicine Access in Gaza (Team Project)
Jun 2026 – Jul 2026
GitHub Repository

- Addressed a real problem many families in Gaza face — difficulty finding available medicine across scattered pharmacies, especially during shortages — by co-developing a Flutter-based platform connecting patients directly with pharmacies.
- Built features for real-time medicine search, availability tracking, pharmacy locations, in-app communication, and order management, powered by a cloud database (Firebase).

Personal Project | *Gaza, Palestine*
TURPOTIC — Luxury Automotive Gallery
Jun 2026 – Jul 2026
Live Demo GitHub Repository

- Built a premium, cinematic automotive gallery for luxury cars and motorcycles with glassmorphism UI and elegant page transitions.
- Implemented category filtering, price sorting, an interactive search drawer, and a live shopping-cart preview with a checkout-style flow.

Personal Project | *Gaza, Palestine*
XTRA — Futuristic Bicycle Experience
Apr 2026 – May 2026
Live Demo GitHub Repository

- Built a cyberpunk-styled bicycle experience using GSAP and Three.js for cinematic animations and interactive particle backgrounds.

Personal Project | *Gaza, Palestine*
Lazord — Dental Clinic & Digital Lab Website
Mar 2026 – Apr 2026
Live Demo GitHub Repository

- Built a healthcare website with a complete authentication system (Login, Register, Forgot/Reset Password) and a Google Sign-In interface.
- Designed a multi-page architecture (Solutions, Products, Workflow, About, FAQ, Contact) with interactive form validation.

Personal Project | *Gaza, Palestine*
Product Inventory System (PHP & Docker)
May 2025 – Jun 2025
GitHub Repository

- Developed a product inventory management system using PHP and MySQL with full CRUD operations; containerized with Docker (Apache and MySQL services).

CERTIFICATIONS

- Claude Code 101 — Anthropic, Aug 2026
- Claude 101 — Anthropic, Aug 2026
- Claude with the Anthropic API — Anthropic, Aug 2026
- AI Fluency: Framework & Foundations — Anthropic, Aug 2026
- Front-End Development Professional Internship — Webura Company, Apr 2026
- Certificate of Appreciation in Freelancing and Remote Work — Lingua Stochos, Mar 2026
- Certificate of Achievement, Translation Workshop — Lingua Stochos, Mar 2026

KEY SKILLS

Technical Skills

- HTML5 & CSS3
- JavaScript & TypeScript
- React
- PHP
- MySQL
- Java (OOP)
- GSAP & Three.js
- Git & GitHub
- Docker
- Responsive Web Design

Soft Skills

- Problem-Solving
- Analytical Thinking
- Clean Code & Structured Development
- Team Collaboration
- Adaptability

LANGUAGE

- Arabic | Native
- English | Upper-Intermediate

INTERESTS

- Web Development, Front-End Development, Software Architecture, Problem Solving, Learning New Technologies
